DayCor®

RAILEYE HD

HD Corona Camera Core for Electrical Traction

RAILeye^{HD} is a corona imager based on a UVc detector and a HD visible camera for inspecting electrical railways. RAILeye^{HD} enables seeing and recording corona discharges in daylight. Corona, which is invisible to the human eye, can be seen only with bi-spectral UV-Visible corona cameras. RAILeye^{HD} is a high definition, highly sensitive bi-spectral corona camera with Ofil's proprietary DayCor® technology inside, capable of pinpointing corona sources, visualizing them, recording and transmitting in real time to a remote receiver or a monitor. Due to its remarkable sensitivity & resilience RAILeye^{HD} is an excellent choice for fast moving inspection of overhead high voltage grid lines and electrical traction, fits well in narrow compartments and can be mounted on fixed or moving mounts. RAILeye^{HD} assists in the diagnosis of medium/high voltage systems by locating deficiencies that are related to electrical fields, or caused by bad design, structural & mechanical problems, contamination, eroded insulation, loss of hydrophobicity and other. Users of RAILeye^{HD} benefit from early detection of electrical faults, get fast inspection results in the format of high resolution video clips, reliable data & pinpointed information in real time. Can be adjusted to customers' configuration.

HIGH SPEED INSPECTION

RAILeye^{HD} transmits HD video on-the-fly, without image processing nor frames integration. The resulted videos are sharp, showing pinpointed information without smearing, even during high speed motion.

EASY INSTALLATION

RAILeye^{HD} fits into narrow compartments installed on a static or moving standard $\frac{1}{4}$ " thread tripod mount. Installation is simple and standard.

DAYCOR® TECHNOLOGY INSIDE

RAILeye^{HD} is a solar blind bi-spectral UV-Visible camera that incorporates Ofil's exclusive proprietary DayCor® technology [Registered Patent EP1112459B1]. RAILeye^{HD} provides reliable accurate data, showing the original occurrences of corona anchored to the emitters, operating continuously without overheating.

HD VIDEO RECORDING & STORING

RAILeye^{HD} records High Definition videos and presents the resulted footage with the count of encountered corona events, date & time and GPS. Videos are stored internally onto a portable memory and transmitted to a remote monitor.

REMOTELY CONTROLLED

RAILeye^{HD} is controlled through a set of communication commands: RS232, Ethernet or Wi-Fi.

ENHANCED INSPECTION FEATURES

RAILeye^{HD} Field of View (FOV) can be adjusted per inspection scene. The FOV is selected from a wide to narrow combinations of optical and digital states. The selected FOV affects the dimension of the scanned area.
