coronaCatch

DATA PROCESSING

Detected corona events are recorded and processed automatically by Ofil's CoronaCatch application, that segregates corona events from non corona events and attaches to each event its specific meta information, including: GPS, ambient conditions and severity.

AUTOMATIC REPORTS

Ofil's CoronaCatch uses the processed information to generate reports that are compatible with Ofil's Corona- Base Reporting Software.

[Registered Patent EP1112459B1]

SOFTWARE

CoronaWise is a database software for electrical engineers that perform inspections with corona cameras and manage the collected data. CoronaWise provides an easy-to-use all-in-one environment to handle information about the condition of assets. With CoronaWise it is easy to document inspections,

store findings, follow up cases, look-up components' history, generate report and analyze trends.

CoronaWise is an effective means to process the massive data that being collected during inspections turning into actual recommendations and reliable reports.

- » FRIENDLY INTERFACE
- » DATA RETRIEVAL & SORTING
- » STORE VIDEOS AND PICTURES
- » AUTOMATIC REPORTS
- » STORE INSPECTION SESSIONS
- » MAINTAIN DATA CONSISTENCY
- » LANGUAGE LOCALIZATION

INSPECTION SESSIONS

CoronaWise stores detailed inspection sessions with related imagery attached. Sessions are the building blocks of reports and include all fields that can provide a comprehensive view.

Single user version is installed on a single computer. The enterprise version has a server/client configuration, creates a central databank and allows access to permitted users. Sharing a repository assists reducing storage needs and reduces redundancy.

REPORTS GENERATION

CoronaWise includes pre-defined system reports that match common management preferences and allows building personal reports. Generated reports are in portable html format, compatible with most existing browsers, and include embedded/linked media of the captured findings, analysis and recommendations.

DATA INTEGRITY

To maintain data integrity clarity and consistency, CoronaWise uses dictionaries. Each organization builds its own dictionary of terminology, components' names etc. Language localization is provided.

DATA RETRIEVAL

CoronaWise facilitates retrieving records by existing fields. Queries are easily created. Results are displayed sorted by a requested order.

DECISION MAKING

CoronaWise complies with Ofil's decision-chart methodology. Ambient conditions, material, distances, gain & counting arguments are used to predict and decide upon the needed maintenance steps.

SINGLE USER OR ENTERPRISE VERSIONS
